ABOUT

Emerging data scientist skilled in designing analytical workflows, training and validating machine learning models, and translating raw data into actionable insights. I bring a structured approach to problem-solving, strong fundamentals in Python and statistical methods

SKILLS

Languages: C, Python, C++, Javascript, PHP, HTML5, CSS3
Databases: MySQL, MongoDB
Frameworks: ReactJS, Node.js, Express.js
Version Control: Git, Github
Soft Skills: Analytical problem-solving, cross-functional collaboration, time management, adaptability, and goal-oriented execution.

KEY COURSEWORK

- Statistics for AIML (SAIML)
- Machine Learning & Soft Computing (MLSC)
- Business Intelligence (BI)
- Database Management System

PROJECTS

Python,
TensorFlow,
PyTorch

Solar Flare Forecasting (Major Project - Ongoing)

Machine Learning / Deep Learning

Developed a multi-modal deep learning model using NASA SDO imagery and SHARP magnetic-field parameters to predict solar flare classes and intensity. Designed a hybrid CNN-GRU architecture with temporal attention, and conducted detailed evaluation using ROC curves, AUC, and confusion matrices to diagnose class-imbalance limitations.

MERN Stack,
Python

Vyaas – AI-Powered Crop Yield Prediction

Full-Stack / Machine Learning

Built an AI-driven agricultural advisory system with multi-service architecture that scores crop suitability, predicts yield and profit, and generates personalized farm recommendations using weather, soil, and market data. Implemented the Top-3 crop recommendation engine, market insights module, and an actionable advisory layer to help farmers improve crop decisions and profitability.

HTML, CSS, PHP

HappyLife

Web Development

Engineered a robust online doctor appointment management system with distinct administrative, doctor, and patient modules. Implemented efficient scheduling, data validation, and user access controls to enhance overall system reliability and user experience.

EDUCATION

2022-2026

Bachelor of Engineering in Computer Engineering

University of Mumbai

Average CGPA (Till Semester 6) - 8.47

2021-2022

D.A.V. International School, Kharghar

D.A.V. College Managing Committee

AISSCE Board percentage - 87.2

POSITIONS OF RESPONSIBILITY

May, 2025 -
Present

SAKEC AICTE IDEALab

General Secretary

Oversee strategic planning and operational execution across a multidisciplinary 24-member team. Drive innovation by converting conceptual proposals into functional, product-oriented outcomes while maintaining coordination across technical and administrative verticals.

September, 2023 -
June 2024

Computer Society of India - SAKEC

Website Team Co-Head

Collaborated with leads to ensure platform scalability, maintenance, and deployment of new features. Led debugging, code optimization, and user interface refinement initiatives to improve usability and performance metrics.
